

Texas Pilot No Longer Grounded

Doug Brittain

Captain Doug Brittain is a really cool guy with one of the most interesting yet demanding jobs ever. He is director of flight operations with a major aviation corporation. He jets all over the world with just a moments notice. Based out of Irving, Texas when he decided it was time for a new smile he turned to Dr. Jirik. Doug explains, "I fly to Little Rock on a regular basis so I looked online and found Dr. Jirik's website. The website was filled with information and photos. It was a good overview and helped me decide Dr. Jirik would probably be a good fit for me." "I made an appointment because I never smiled", explains Doug. "On a good day you might get a half smile because my teeth embarrassed me. When I met with Dr. Jirik, I explained my crazy work schedule. He and his staff assured me they would work with me and they did. I desperately wanted to eat a great steak and be able to tolerate cold drinks. Overall I just wanted to be healthy again." Doug says, "Upon entering Dr. Jirik's office, I felt I was at home. Warmth, caring and happiness surrounded me there. I have been treated like a family member, during my entire treatment. Dr. Jirik was extremely professional, thoughtful and knowledgeable. I could tell he truly cared about me and my health. Now I can eat and drink whatever I want. I feel my overall health has improved. My smile makes me happy. It has changed my outlook on many things for the better."

Doug wanted a smile that would increase his quality of life and make him feel healthy. All too often we see patients who are about to have smile makeovers without any consideration of the underlying problems in their mouth that has put them in their current position. The best result

comes when we start from square one and treat the core dental problems. Then we address the way we want the smile to look. The real beauty of our smile makeovers is the unseen corrections that help insure many years with a handsome and functional smile. Twenty one years of experience allows Dr. Jirik to use the principles of aesthetic smile design for natural teeth, dental implants or custom dentures. Utilizing the multi-modality approach allows Dr. Jirik to treat almost anyone regardless of age, health or condition of the teeth by determining what best suits his individual needs and desires for a smile. Simply put, we can restore function, increasing the overall ability to eat and speak, as well as improve physical and emotional well being. We can turn crooked, misshapen teeth into a straight white smile with cosmetic veneers or cosmetic crowns. We can also give back the teeth you've lost with dental implants or cosmetic dentures. "Best of all they worked with my schedule", says Doug. "I couldn't believe the investment of time was so minimal." Because of time limitations we suggested Doug take advantage of IV sedation. Sedation dentistry is a blessing for our patients. It reduces the procedure time and allows for a more comfortable experience. Doug actually slept during the entire procedure and woke up with a smile he loved. Doug laughs, "Now my family and friends won't take photos with me until they have seen Dr. Jirik. I want others to know if you don't have your health what do you really have? You really can't put a price on happiness, health and enjoying life. Just do it. When you do, you will wonder why the heck you waited so long."

One Surgery, One Doctor, One Hour

Dr. Samuel F. Jirik has placed and restored more than 4000 dental implants for hundreds of patients since 1989. Computer guided implant placement or CGIP is the most impressive technological breakthrough in implant dentistry he has seen. CGIP is not a cheaper or compromised alternative to

conventional implant placement and restoration. However, CGIP eliminates a procedure that used to take three months to one year with multiple surgeries. Now there is one short surgery. Discomfort and swelling is a thing of the past. Enjoy the immediate use of the dental implants and return to work and a

normal routine shortly after treatment. Our clinic can provide most patients a solution with only one surgery, in one hour by Dr. Jirik alone. Make 2008 the year that you increase your confidence, improve your looks and make eating a lot more satisfying with computer guided implant surgery.
